

ENVIRONMENTAL POLICY STATEMENT

Munro and Miller Fittings Ltd consider the environmental effects and implications of its activities in the manufacture and supply of welding fittings and metallic expansion joints. It is therefore the Company's policy to do all that is reasonable to achieve the following aims.

1. Conform to all relevant legislation and in particular the Environmental Protection Act. Review Environmental Legislation at least annually to ensure M&M remain compliant in all areas.
2. Consider the environmental aspects of all processes and impact of materials used in the Company's products and services, minimise waste and dispose of excess in a manner which avoids adverse effect on the environment.
3. Avoid causing unnecessary or unacceptable detriment to the environment in relation to all employees, customers, suppliers, general public and local community.
4. Develop the environmental awareness of all employees and make them aware of any individual responsibilities.
5. Make available to employees, customers, suppliers, general public, local community and statutory bodies relevant information about the Company's activities which affect health, safety and the environment.
6. Periodically review environmental issues and investigate any occurrences which may cause unacceptable detriment to the environment.
